Aura S. Tornell.

INTRODUCCION .

En el programa del Instituto Nacional de Investigaciones Biológico-Pesqueras se han incluido como una de las labores importantes, - los estudios sobre el plancton marino de aguas litorales.

Actualmente contamos con Estaciones de Biología Pesquera en - Ensenada, B.C.; La Paz, B.C.; Mazatlán, Sin.; en Salina Cruz, Oax., y en el Golfo de México, en Tampico, Tamps., y en Campeche, Camp. El personal de esas Estaciones así como el dependiente del Laboratorio Central del Instituto en la Ciudad de México, realiza trabajos de biología pesquera, han estado colectando muestras de plancton marino, de aguas salobres en los esteros y en aguas dulces. El mismo Laboratorio Central en la Ciudad de México ha constituido recientemente una Sección especializada en Planctología, la cual trabaja en estrecha relación con los Laboratorios foráneos. El número de muestras colectadas ya es considerable, actualmente se estudia exhaustivamente en la Sección antes mencionada.

La Bibliografía que se requiere para realizar los estudios - es diversa y de número considerable, publicada prácticamente en todos - los idiomas, sobre todo en Inglés, Francés, Alemán, etc. La consecución de este material es bastante difícil y se ha emprendido una campaña de intercambio de publicaciones para ir completando nuestra Biblioteca. La presente contribución a la bibliografía sobre el plancton hecha por el Biólogo Manuel Flores Villegas, Director de la Estación de Biología Pesquera de "El Sauzal", B.C., ayudará indudablemente a los trabajadores de esta importante actividad de la Biología Marina y por ello se ha dado a la publicidad, interesándose sobremanera nuestro Instituto en que las personas o Instituciones a cuyas manos llegue, nos remitan sus trabajos tanto a la Estación de Biología Pesquera de "El Sauzal", B.C., como a la Biblioteca del Instituto en la Ciudad de México.

EL DIRECTOR DEL INSTITUTO NACIONAL DE INVESTIGACIONES BIOLOGICO-PESQUERAS. -

BIOL. MAURO CARDENAS FIGUEROA.
