INTRODUCCION

Este boletín tiene como función principal dar a conocer a todos los sectores involucrados en la pesca de camarón en el Pacífico la información de que dispone el Instituto Nacional de Pesca en cuanto a embarcaciones de alta mar y sus características y, al mismo tiempo, solicitar que nos brinden su colaboración a todas aquellas personas que puedan mejorar y actualizar esta información.

El trabajo no está relacionado en forma alguna con aspectos administrativos/legales. Su objetivo fundamental es proveer la necesaria base de información técnica para analizar el poder de pesca, año con año, de los distintos tipos de embarcaciones. Tal análisis es fundamental para poder realizar el estudio global de la pesquería de camarón.

Este registro de embarcaciones camaroneras de alta mar será actualizado semestralmente, con toda la información que pueda suministrarse al Instituto Nacional de Pesca. Altas y bajas de barcos, características y modificaciones a las mismas, etc. son datos que requiere el Programa Camarón del Pacífico para cumplir adecuadamente con sus objetivos.

Cada embarcación tiene asignada una clave que consta de cinco dígitos, los dos primeros indican su puerto de registro; los tres últimos le dan un número consecutivo dentro de cada puerto. Esta clave es necesaria, ya que el proceso de los datos se realiza en su mayor parte automáticamente.

Agradecemos de antemano la colaboración que usted nos envíe.

Los encabezados de columna, en este trabajo y su significado, se detallan a continuación.

Significado de los encabezados de columna y número para clasificar el material del casco de la embarcación, el sistema de conservación utilizado en la misma y el uso que se le da.
